

<https://thewellnessenterprise.com/emoto/> **Dr. Masaru Emoto and Water Consciousness**

in Featured /

Dr. Masaru Emoto, the Japanese scientist who revolutionized the idea that our thoughts and intentions impact the physical realm, is one of the most important water researchers the world has known. For over 20 years until he passed away in 2014, he studied the scientific evidence of how the molecular structure in water transforms when it is exposed to human words, thoughts, sounds and intentions.

The extraordinary life work of Dr. Emoto is documented in the New York Times Bestseller, [The Hidden Messages in Water](#). In his book, Dr. Emoto demonstrates how water exposed to loving, benevolent, and compassionate human intention results in aesthetically pleasing physical molecular formations in the water while water exposed to fearful and discordant human intentions results in disconnected, disfigured, and “unpleasant” physical molecular formations. He did this through through Magnetic Resonance Analysis technology and high speed photographs.

See the following water crystal photographs from Dr. Emoto’s work. Each water crystal you see was exposed to the word it has written next to it prior to being photographed:

His research also showed us how polluted and toxic water, when exposed to prayer and intention can be altered and restored to beautifully formed geometric crystals found in clean, healthy water. The following photos are images of photographs of the the water in the Fujiwara Dam before and after the Reverend Kato Hoki, chief priest of Jyuhouin Temple, offered an hour long prayer over it.

Dr. Emoto also studied how sound affects water. The Emoto music studies demonstrate how certain types of sound, like classical music, generate beautiful crystalline patterns, while heavy metal music, generate ugly and distorted crystalline formations. In the images below you see the crystalline formation resulting from water being exposed to *Mozart's Symphony No. 40* and then in contrast what the water crystal image looks like after listening to heavy metal music.

Dr. Masaru Emoto put Water as a Living Consciousness on the map for the scientific world. He showed us how water is an energy capable of more than we ever imagined. The power human thoughts, sounds and intentions has to strengthen and disempower is one of the greatest discoveries of our time.

His work has us question, if water is affected by the words, intentions, and energies, what about human beings, who are made of mostly water? If we transform the water and thoughts we are made of, what else is possible?

There are legions of scientists who have built upon the breakthroughs of Dr. Emoto and are offering practical technologies for everyday life. One such example who we find particularly inspiring is the Austrian Engineer Bernard Ratheiser. Since 1994, he has developed devices that restructure water molecules and assist water in being its highest vibration as living energy.

With vortexing and sacred geometry along with nature's energies through precious stones, Bernhard Ratheiser has created a way for water to be revitalized when it passes through one of his water structuring devices. Every measurement in his beautiful devices is designed to evoke the energy of the cosmos and realign water with the energy of creation. Take a peek inside the [Jivara Maximus Whole House device](#) in the image below:

When water passes through his [Jivara UMH devices](#), everything life supporting in the water is enhanced, energy increases, memory is erased, and toxins are energetically neutralized. The following are actual photos of water that passed through the Jivara UMH device using the Emoto Protocol:

Jivara Water seen with the Emoto Protocol

Before Jivara

After Jivara

Water crystal photos after purification with the Jivara Maximus show a significant improvement in crystalline structure. Inherent spring water quality is restored.

We live in exciting times when new technologies like water structuring devices are making it easy for us to access water's highest vibration. Our understanding of the natural world is moving to new levels as technology embraces the truth of [structured water science](#) with sacred geometry, vortexing, and gemstones. Thanks to the work of Dr. Masaru Emoto, we now know what is possible when we consider water as a living consciousness. There are now many scientists diving deeper into what's possible with the energy of water. If you'd like to continue to expand your knowledge there are many great resources such as [these videos](#) on YouTube. For more information, you can also visit: www.thewellnessenterprise.com
